PROFESSIONAL SUMMARY

IT infrastructure and security professional with over 10 years of experience designing, operating, and governing enterprise systems across on-premises and hybrid cloud environments. Deep hands-on background in Active Directory, Azure AD, identity administration, and access governance, combined with practical exposure to Zero Trust principles through network segmentation, VPN and firewall management, endpoint security, and least-privilege access control. Skilled at leading infrastructure and security operations aligned to ISO 27001, coordinating with cross-functional and, and driving automation through PowerShell, Python, and Bash to reduce manual overhead. Experienced people leader with a track record of managing teams, escalations, and vendor relationships across multi-location operations.

CORE COMPETENCIES

• Identity & Access Management (IAM) • Cloud Infrastructure (Azure, AWS-exposure, GCP) • Systems Administration (Linux/Windows/macOS) • Vendor & Team Management	• Active Directory / Azure AD • Network Security (Firewalls, VPN, Segmentation) • Automation & Scripting (PowerShell, Python, Bash) • IT Governance & Compliance	• Zero Trust Principles & Access Governance • ISO 27001 / SOC 2 Alignment • Incident Response & RCA • Digital Transformation

PROFESSIONAL EXPERIENCE

Assistant Manager IT Devsinc	Dec 2024 – Present
• Own end-to-end IT infrastructure and network operations, including cloud integration, system deployment, and access management across the environment. • Administer identity and access services across Google Workspace and Microsoft 365 — provisioning, permissions, and enforcement of least-privilege access policies. • Manage Azure, VMware ESXi, and Windows Server environments, ensuring uptime, security, and performance of Active Directory, file, and print services. • Configure and maintain LAN/WAN, VPNs, VLANs, routing, switching, and firewall policies (Fortinet) to enforce network segmentation and minimize exposure of internal services. • Perform network tuning, traffic analysis, and troubleshooting to sustain secure, reliable connectivity for hybrid users and applications. • Drive ISO 27001 & ISO 9001 alignment across IT, datacenter, and operations — supporting audits with technical evidence and system configuration records. • Lead risk assessments and infrastructure audits, translating findings into hardening and access-control improvements.	

System Engineer SSA Soft	Oct 2023 – Dec 2024
• Managed GCP, Azure, and Microsoft 365 environments, including MFA, DLP, licensing, and identity-driven access controls. • Administered O365 tenant, domain, and DNS configuration to maintain secure operational baselines. • Implemented layered security controls (Defender, ATP, AIP, Cloud App Security) to reduce exposure to cyber threats and enforce device/user posture standards. • Monitored security alerts and led first-line incident response and end-user support. • Administered Windows Server, Active Directory, DNS/DHCP, and file/print infrastructure. • Configured and maintained Cisco, FortiGate, and pfSense devices and VPNs for secure remote access.	

IT System Engineer Kaizen Paints (formerly Kansai Paints) Pvt. Ltd, Lahore	Feb 2022 – Oct 2023
• Provided system administration and access support for Microsoft Dynamics ERP across Finance and Operations. • Administered Azure, GCP, ESXi 6.5/6.7, Windows Server, Active Directory, and file/print infrastructure. • Managed Exchange, SharePoint, OneDrive, and Teams health and access services within Microsoft 365.	

- Managed Endian/pfSense firewalls, VPNs, and endpoint security (Kaspersky), and administered backups on QNAP NAS.

System Network Engineer / *PITB, E-Rozgaar Program*

Feb 2018 – Feb 2022

- Managed and secured network hardware, routers, and switches across a multi-site infrastructure.
- Maintained operational reporting (MIS) and coordinated cross-functional program delivery at scale.
- Acted as regional lead for outreach and stakeholder engagement, coordinating with universities, colleges, and program teams.

CSE-NOC / *PTCL, Service Desk Support Center (NOC), Lahore*

Jun 2015 – Feb 2018

- Led as Team Lead in the Broadband Service Desk / NOC, managing and troubleshooting the Central Zone network.
- Performed remote access-network troubleshooting (Telnet, SSH) across Layer 2 infrastructure (Huawei, ZTE, Alcatel).
- Coordinated incident response with National NOC and business/technical teams, resolving tickets against SLAs using BNCC and AAA.

Additional Experience & Leadership: Publicity Committee Lead, IEEE ITU Student Branch (Sep 2021 – Aug 2022) — led outreach and event publicity alongside MS coursework. | Summer Intern, SNGPL (Telecom) & LESCO, Lahore (2013) — early exposure to telecom and utility infrastructure operations.

KEY ACHIEVEMENTS

- Led enterprise cloud, identity, and Microsoft 365 modernization initiatives across multiple organizations.
- Strengthened IT governance and access control posture in alignment with ISO 27001 standards.
- Delivered infrastructure and ERP projects with minimal business disruption while improving service reliability.
- Built and led cross-functional and vendor relationships supporting multi-site, multi-team operations.

EDUCATION

MBA — University of Engineering and Technology, Lahore	2026
MS, Computer Science — Information Technology University	2024
B.E., Electronics Engineering — Lahore College for Women University	2014

TECHNICAL SKILLS

Identity & Access: Active Directory, Azure AD, IAM fundamentals, MFA, access provisioning/de-provisioning

Cloud & Virtualization: Microsoft Azure, GCP, VMware ESXi, Microsoft 365

Network & Security: Fortinet, Cisco, pfSense, Endian, VPN, DNS/DHCP, VLANs, network segmentation, Defender, Cloud App Security

Systems: Windows Server, Linux (Ubuntu, Kali), macOS-adjacent endpoint management, Exchange, SharePoint, Teams

Automation & Scripting: PowerShell, Python, Bash, C/C++

Governance & ERP: ISO 27001, ISO 9001, Microsoft Dynamics ERP, Power BI, ITSM (Freshworks)
